Product designer with an M.S. in Human-Computer Interaction and experience in product discovery, usability testing, and interaction design. Turns research insights into testable prototypes and implementation-ready designs.

SKILLS

User research
Usability testing
Interaction design
Information architecture
Wireframing
Prototyping
Lean UX

TOOLS & CODE

Figma / Framer / Axure

Adobe XD / Illustrator / Photoshop

HTML / CSS / JavaScript / Swift

LANGUAGES

Japanese - Native
English - Working proficiency

EDUCATION

DePaul University
M.S., Human-Computer Interaction | Chicago, IL

Jan 2024 - Jun 2025

Chuo University
Bachelor of Laws | Tokyo, Japan

Apr 2018 - Sep 2022

EXPERIENCE

Product Designer | Money Forward
Tokyo, Japan | Apr 2026 - Present

- Conducted 20+ usability tests and 5+ user interviews for new-product discovery to identify user needs and validate product hypotheses.
- Used AI-assisted coded prototypes to explore concepts, test assumptions, and iterate on product experiences.

Product Designer Intern | Money Forward
Tokyo, Japan | Nov 2025 - Mar 2026

- Evaluated Figma design system components and proposed improvements aligned with engineering constraints.
- Designed pagination concepts and collaborated with PMs and engineers on implementation-ready handoff.
- Mapped key user journeys and created low-fidelity flows for a workplace stress-check application, considering regulatory constraints.

UX Researcher / Designer Intern | Marketeq Digital
Miami, FL / Remote | Sep 2025 - Nov 2025

- Analyzed competitor and user experiences to inform content structure and interface design for a talent marketplace contract flow.
- Translated research findings into wireframes focused on clarity and confidence during decision-making.

SELECTED PROJECTS

ClassCollab
Team formation for student projects
Apr - Jun 2025

- Designed and tested a team formation tool; a landing page MVP recorded a 60% click-through rate, followed by prototype testing with seven graduate students.
- Refined onboarding, team previews, and group overviews; the tested prototype received an average System Usability Scale (SUS) score of 82.5.

RunBuddy
Finding compatible running groups
Apr - Jun 2025

- Used surveys, interviews, and affinity mapping to identify social and logistical barriers to joining running groups.
- Designed a Figma mobile prototype and Framer walkthrough, then iterated through user validation to clarify group fit and joining flows.
